

Stonebridge Statement on COVID-19

At Stonebridge at Montgomery, the health and well-being of our residence and staff is our top priority and we have been working diligently since early March to address the COVID-19 pandemic.

We are carefully following guidance provided by the Centers for Disease Control and Prevention, Centers for Medicare and Medicaid Services, New Jersey Department of Health and the Montgomery Township Health Department regarding our COVID-19 response and prevention measures, which include:

- We strongly encourage all residents to comply with the stay-at-home orders issued by the governor. We provide support for deliveries of meals and supplies so residents do not need to make unnecessary trips outside.
- A strict no non-essential visitor policy was implemented last month throughout the community.
- We screen all employees and essential visitors by taking each person's temperature using a no-touch thermometer and asking about symptoms or potential exposure. Those who do not pass the screening are not allowed to enter the building.
- All staff members wear a mask while working at the community.
- Residents are required to wear a mask if they are outside of their residence.
- Staff members who are confirmed or under investigation for COVID-19 are not allowed to work until they have tested negative or have recovered in accordance with Centers for Disease Control and Prevention (CDC) guidance.
- A resident who is confirmed or under investigation for COVID-19 will be isolated or quarantined and staff who are in contact with them will wear appropriate personal protective equipment as per CDC guidelines.
- We have suspended group dining, activities, meetings, and events. We continue to offer free meal delivery to all residents.
- All common areas and high-touch surfaces throughout the community are cleaned and disinfected at least twice a day.
- Hand sanitizer stations are available in multiple locations throughout the community.
- Non-essential visits by staff to resident apartments have been discontinued. Staff members only enter a resident's apartment for emergency medical, maintenance, or sanitation purposes and employees wear appropriate personal protective equipment.
- In compliance with New Jersey Department of Health requirements, we provide notification for all positive and suspected COVID-19 cases to residents, staff and families.
- As required, we provide a detailed report to the Montgomery Township Health Department regarding cases in our community.

Stonebridge is supported in this effort by our parent organization, Springpoint Senior Living. The Springpoint senior management team and leadership from all lines of business are working 24/7 to help manage our response to this unprecedented challenge. We hold daily conference calls and specialized work group virtual meetings to share best practices, provide updates on policies and procedures, address challenges and reallocate resources as needed.

We are grateful to our staff members who are selflessly serving our residents and going above and beyond the call of duty. We continue to follow established protocols and directives from our local, state, and federal agencies to promote employee and resident safety and reduce the chance of exposure or transmission.
